

SCAN 3

TROLLEY FOR SELF-SCANNING

EXACT
I BUTIK

SELF-SCANNING

Lower basket edge.
Perfect for 3 scanning bags

ACCESSORIES

Can be obtained with a RelaXT handle and other accessories.

> SCAN 3, SCAN 3 BASE

The design with a lower basket makes it significantly easier to lift the crates out of the trolley. With the compact format of the trolley, you have a trolley that is optimum to steer, but very spacious at the same time. The trolley is equipped with a child seat (in anthracite). If no child is sitting in the child seat, it functions as an extra basket, perfect when you scan fruit, vegetables or for placing goods that you are extra protective of.

Scan 3 is delivered bright zinc plated, with a black Ovaly handle, and with transparent plastic moulding to protect the basket edge against oxidation and corner protection in grey anthracite in order to protect the interior equipment.

A number of accessories are available such as another colour for plastic details and handles, Euroloc shopping trolley lock, safety belt for children, Trolleymatic handle, different RelaXT handles, with and without holder for scanner and holder for a coffee mug.

> TECHNICAL INFO SCAN 3
