> SCANDINAVIA 212L

Scandinavia is our own line of shopping trolleys produced in accordance with the specific requirements for quality and durability that reign in the Scandinavian market. What characterises the Scandinavia 212L is that it nests with other common shopping trolleys in the 212-214L segment.

Delivered bright zinc-plated, with a round handle, with space for the shop's logotype, and with transparent plastic moulding to protect the basket edge against oxidation, and protective corners in anthracite to protect the shop interior. The trolley is by default equipped with a child seat in anthracite.

Wheel with 125 mm precision ball bearings and wheel roller in TPE, for best possible strength and comfort.

A number of accessories are available such as another colour for plastic details and handles, shopping trolley lock, safety belt for children, Ergogrip-, Trolleymatic- or RelaXT-handle, holder for scanner and coffee mug.
