Safety belt

ACCESSORIES:
RelaXT handle

> SCANDINAVIA 255L

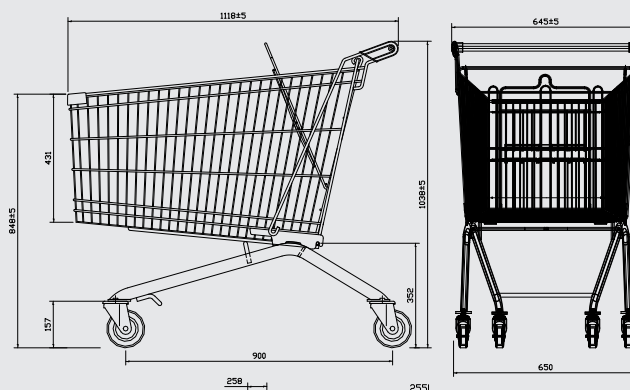

Scandinavia is our own line of shopping trolleys produced in accordance with the specific requirements for ergonomics, quality and durability that reign in the Scandinavian market.

What characterises the Scandinavia line is that it is broader and shallower in comparison with trolleys produced for the rest of the European market. Despite its size, the trolley is very easy to steer.

Scandinavia 255L is delivered bright zinc plated, with an Ovaly handle, and with transparent plastic moulding to protect the basket edge against oxidation, and protective corners in anthracite to protect the shop interior. The trolley is by default also equipped with a multifunctional child seat in matching anthracite.

Wheel with 125 mm precision ball bearings and wheel roller in TPE, for best possible strength and comfort.

A number of accessories are available such as another colour for plastic details and handles, safety belt for children, shopping trolley locks, RelaXT handle, holder for scanner and coffee mug.

MODEL	SCANDINAVIA 255L
ITEM NO.	S255H
